FLYING LEVER TERMINAL BLOCK

EASY, FAST, SAFE

THE EVOLUTION OF THE SPECIES

IN ONE CLICK!

Cabur presents the UC series, a new line of flying lever terminal blocks. The line includes easy of use 2.5 mm² and 4 mm² terminals, with two, three and five poles.

The exceptional versatility can be applied in various application such as building automation, small/medium industrial automation, shipbuilding and domestic installation.

Advantages:

- Very fast connection thanks to the lever, no additional tools required
- Direct push-in type connection of rigid cables or cables equipped with ferrules
- Connection and removal of flexible cables with the lever
- Transparent body for quick inspection of correct wiring
- The clamp avoids the risk of breaking of the cable caused by the direct tightening of the screw
- The pole connection avoids the cables twisting and the risk of overheating

TECHNICAL DATA

- Push-in technology
- Quick installation without using tools
- Safe connection of different wire section
- Compatible with both rigid and flexible cables
- Poor contacts risks reduced
